

The Science of Climate Change, Free Workshop for Rising 11th & 12th Graders in NC, June 15-19, 2015. The U.S. Environmental Protection Agency (EPA) is offering a FREE Summer Enrichment Program to educate NC high school students about the science of climate change. Students will learn what climate change is, how it can affect their health and lifestyle, how EPA scientists are researching climate change and adaptation, and what students can do to reduce the impacts of climate change. Rising 11th and 12th graders in NC are eligible to apply, and participation is limited to 25 students. The Program is June 15-18, 2015 (Monday-Thursday) from 9 am to 4 pm with an optional session led by the Alliance for Climate Education on Friday, June 19. The Program will be held at the U.S. EPA Campus, 109 TW Alexander Dr. in RTP, NC. **Applications will be accepted on a space-available basis.** Questions: Contact Kelly Witter at witter.kelly@epa.gov.
